

# PERSONALIZED HEALTHCARE EXPERIENCES FOR YOU

## Who Are We?

TIBU Health is a health technology company building a seamless primary care platform to conveniently deliver world-class healthcare experiences where people live, work and click.

## What Do We Do?

### Primary Care

The focus of primary care is centered around you and your wellbeing, where a team of healthcare professionals assist you in managing both immediate and long-term health issues.

### Urgent Care

If you require prompt medical attention for a non-life-threatening condition, urgent care can be a suitable option.

### Chronic Disease Management

Our patient follow-up program aims to prevent the progression of disease by focusing on the management, monitoring and education of patients.

### Employee Health and Wellness

Employee health and wellness focuses on improving the wellbeing of employees through various programs and initiatives, with the aim of promoting physical, mental and emotional health.

### Women's Health

Women's health comprised of a diverse range of healthcare services encompassing routine gynae exams such as pap smears and STI testing, laboratory investigations, and the diagnosis of acute conditions like UTIs.

### COVID-19 Care

Our end-to-end service is fast, government approved and fit for travel.

## Why Choose Us?

### We Operate On Your Time

Schedules are busier than ever. We come to you at at time and location of your choosing to seamlessly integrate with your day.

### New Healthcare Experiences

No more traffic, no more congested waiting rooms. We personalise your healthcare journey to keep you safe and cozy at home for the best possible health outcome.

### Affordable & Flexible

Great healthcare should not break the bank. We work hard to keep services affordable. We also accept all forms of payment - no questions asked!
